Dublin March 29. 1859.

Dear Mr Mary

You & I have a mutual interest in wanderers Lou. We have just a letter from one in which he says that after spending 4 months in Australia & seeking with much success for employment he had pretty much made up his mind to go to San Francisco & so home by the way of & Sandwich Isles New York & Boston. He asks for letters if we can get any to San Francisco & I have got one for him to the only person there of whom we have any knowledge. Could you & or any of our mutual friends oblige us by forwarding to the post office in that city directed to Richard W. Webb any thing of the kind that might be of use to him. I have always heard that such letters are of little use in the U. States - people are expected to take care of themselves. However there is no knowing what benefit might result from his knowing somebody to call upon in case of a pinch. Mary Lou is perfectly steady & good humoured & good principled - & with due grace nobody. From his childhood he was given to wandering ah he could read about Australia & the South Seas She seemed as if he could not settle down tho he had petitioned them long ago. I did not

who took an expensive trip, either on his account
or on my own. But all who have seen much
for way in many things — & there has been my
experience with both of them altho I have had
literally no trouble with either of them on any
ground of morality or good principle. Which is
much to be thankful for. If my son should
reach your side of the Continent & your part of
it I hope he will see some of my friends there
as I have here with the same of my friends there
Warren an household words here. If he
should be in want of money to reach home
(which I hope he may not) you will much oblige
me by honoring his draft for what he may
ask for on this account & I shall be duly
honored by me. I am sorry to see even trouble
had clouded in the use of having friends if we cannot
trouble them at a pinch. He is rather thick
— and unlike my family — wears a beard & mus-
tache & has a very slight hesitation in his
utterance. H.C. Wright, P. Pillsbury & others of
our American Friends would know him well. He
would have Chairman as when he called in Paris.
Mrs Remond fine as ever. She seems devoted
to her work — & is not unworthy to be present at a
Concert or an Opera when they open. They Lon was
only last to see Fisk & Mario last night & they
were desperately crushed by the crowd — but no very
fatal has resulted.

I am getting hopeful about the Lords Comm. becoming they have branded their own monstrous, their own edict (a mean of mark) & O'Connor to boot. I think it would be well to send Wilson Armstead some copies of the Liberator, containing Phillips article which he spoke of. I can only get it ~~to-day~~ yet — but it may come today.

Mich R. goes to Waterford on mortal mission & then to Cork.

This day I am in the "ah ag" in the body of Lacey town of the municipal enclosure where Dublin on the way to London, when the rest have already arrived. They have got a glorious reception in England. Here they abominate, curse the want & shame the hateful, miserable, tyrannical Govt they are d. Kings & dukes may do as they please as far as they care, provided the Church is allowed to be "Heresy over them" Nobody can know what Poperty is who is not to endure her live in a Popish country. It is the same in spirit & in pretension & in operation as in the time of the Duke of Alva & of Torquemada.

Ever truly yours

Richd Davis
